SUMMARY

Frontend engineer with 8+ years building React and Angular applications across AdTech and EdTech. Drove the platform-wide Angular 9 → 15 migration of Operative's AOS ad-sales platform, designed its Micro Frontend architecture, and cut application load time by ~35% through state, API, and rendering refactors. Sets frontend architecture direction, owns code-quality standards, and mentors engineers across the team.

SKILLS

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
Frameworks	React.js, Angular (9–17), RxJS, NgRx, Redux
UI / Styling	Material UI, PrimeNG, Tailwind CSS, Bootstrap
Architecture	Micro Frontends (MFE), REST APIs, Broadcast Channel API
Testing	Jest, Jasmine
Tooling	Webpack, Babel, npm, Git, Stencil JS
AI Tooling	GitHub Copilot, Cursor

WORK EXPERIENCE

Senior Software Engineer — Operative Media

04/2022 – Present

- Own frontend architecture for the **AOS** ad-sales platform (React.js + Angular), shipping business-critical modules for content management, advertising workflows, and analytics.
- Drove the platform-wide **Angular 9 → 15** migration — modernizing the stack with no regressions and improving long-term maintainability.
- Cut application load time by **~35%** by eliminating redundant API calls and refactoring state management and rendering hot paths.
- Designed and rolled out a **Micro Frontend** architecture, enabling product teams to build and deploy modules independently; built cross-window and cross-module communication on the **Broadcast Channel API**, replacing brittle event hacks across the platform.
- Partner with Product and Engineering on backlog grooming, story scoping, and release planning — breaking down epics, unblocking the team mid-sprint, and triaging production defects.
- Set code-quality and architecture standards, run code and design reviews, and mentor engineers across the team — raising review throughput and reducing post-release defects.

Senior UI Developer — Happiest Minds

04/2021 – 05/2022

- Built **SUCCESSMAKER**, a responsive Learning Management System in **Angular 11**, **RxJS**, and **ngx-translate** — delivering a multi-locale, internationalised UI for learners.
- Designed a library of framework-agnostic web components in **Stencil JS**, consumed by both Angular and React apps — eliminating duplicated UI code across product teams.
- Shipped **Practice Generator**, a worksheet authoring tool built with **NgRx Store**, enabling content teams to assemble and publish practice material at scale.

Front End Developer — Accenture

05/2017 – 04/2021

- COX Communications** — worked as a **DevOps Engineer** (2017 – 2018) in the Telecom BSS and Retail domain.
- Owned BSS activities including production deployments (manual and Jenkins), patching, validations, restarts, and monitoring of applications and servers.

EDUCATION

Bachelor of Engineering, Computer Science

Kongu Engineering College • 2013 – 2017
